

# **Evaluation Report of Environmental Directives Compliance**

Product Name : SOLAR INVERTER

Product Models : SUN2000-50KTL-M0, SUN2000-60KTL-M0

Report Number : SYBH(G)03824184

## Reliability Laboratory of Huawei Technologies Co., Ltd.

(Global Compliance and Testing Center of Huawei Technologies Co., Ltd.)

Administration Building, Headquarters of Huawei Technologies Co., Ltd., Bantian, Longgang District, Shenzhen, 518129, P.R.C

Tel: +86 755 28780808 Fax: +86 755 89652518

## **Notice**

- 1. The laboratory has passed the accreditation by China National Accreditation Service for Conformity Assessment (CNAS). The accreditation number is L0310.
- 2. The laboratory has passed the accreditation by The American Association for Laboratory Accreditation (A2LA). The accreditation number is 2174.01, 2174.02 and 2174.03.
- 3. The laboratory (Reliability Lab of Huawei Technologies Co., Ltd) is also named "Global Compliance and Testing Center of Huawei Technologies Co., Ltd", the both names have coexisted since 2009.
- 4. The evaluation report is invalid if not marked with the signatures of the persons responsible for preparing and approving the report.
- 5. The evaluation report is invalid if there is any evidence of erasure and/or falsification.
- 6. The evaluation report is based on the completeness and adequacy of the data and information submitted by the applicant to Reliability Lab. Reliability Lab has not verified and will not be responsible for the accuracy or their true representation of the data and information submitted by applicant. The applicant shall make its/his/her own judgment as to whether the information provided in this evaluation report is sufficient for its/his/her purposes.
- 7. Content of the evaluation report, in part or in full, cannot be used for publicity and/or promotional purposes without prior written approval from the laboratory.

**Applicant**: Huawei Technologies Co., Ltd.

Address : Administration Building, Headquarters of Huawei

Technologies Co., Ltd., Bantian, Longgang District,

Shenzhen, 518129, P.R.C

Product Name : SOLAR INVERTER

Product Model : SUN2000-50KTL-M0, SUN2000-60KTL-M0

Date of Receipt Sample : 2018-02-17

Start Date of Evaluation : 2018-02-17

End Date of Evaluation : 2018-02-20

**Evaluation Result** 

| Regulation                                   | Conclusion     |
|--|----------------|
| 2011/65/EU ( EU RoHS) & other RoHS           | Complies       |
| directives in other countries                |                |

## 1 General Information

1.1 Applied Standard

Applied Product Directives &

Standards

2011/65/EU ( EU RoHS) & EN50581

Regulation (EC) No. 1907/2006 (EU REACH)

2006/66/EC&2013/56/EU(Battery Directive)

Huawei's Requirements for Restricted Substances

China RoHS and India RoHS

2012/19/EU (WEEE)

Similar RoHS and WEEE Directives in other countries

Test Methods : See detailed evaluation contents

1.2 Evaluation Location

Evaluation Location : Reliability Laboratory of Huawei Technologies Co., Ltd.

Address : Administration Building, Headquarters of Huawei Technologies

Co., Ltd., Bantian, Longgang District, Shenzhen, 518129,

P.R.C

1.3 Evaluation Environment Condition

Ambient Temperature : --

Relative Humidity : --

Atmospheric Pressure : --

## 2 Product Information

Product Name : SOLAR INVERTER

Product Models : SUN2000-50KTL-M0, SUN2000-60KTL-M0

Product Photo :

Remark: Two models have the same external view.

## 3 Review of Document of Conformity (DoC)

As per Huawei's requirements of material compliance, all suppliers should provide DoC (Document of Conformity), MCD (Material Composition Declaration) and the test reports of high-risk materials to prove that their products comply with the requirements of Huawei. All suppliers of materials / parts in products should declare their products meet Huawei's environmental requirement, including RoHS requirements, REACH requirements, packaging requirements, battery requirements and other Huawei's special requirements.

In the process of environmental compliance evaluation, all suppliers documents were evaluated according to Huawei's requirements, and all results were described in table below.

Table 1 Evaluation Results of DoC

| Material Descriptions | Reason of Non-compliance | Conclusion |
|-----------------------|--------------------------|------------|
| All Materials         | NA                       | Pass       |

Remark: NA = Not Applicable

## 4 RoHS Evaluation of Product

## 4.1 Evaluation of Materials / Samples

According to the European Standard of EN50581: 2012 and Huawei *Product RoHS Certification Guide*, the high-risk materials should be tested during the RoHS certification process and all materials (the non-risk materials and high-risk materials) were evaluated according to Huawei's requirements (See clause 3). As per the Directive 2011/65/EU and their amendments (RoHS Directive) and other RoHS directives in other countries, the evaluation results were summarized in table below based on the product's Bill of Material (BOM) and tested results provided by the applicant.

## (1) High Risk Materials / Samples Information

Table 2 Evaluation results of high risk materials / samples for RoHS

| Item                 | Evaluation of High Risk Materials / Samples <sup>#1</sup> |   |  |  |  |  |
|----------------------|---|---|--|--|--|--|
|                      |   | Amount  |  |  |  |  |
| High Risk Material   | High Risk Samples in Product#2                            | Samples in Product <sup>#2</sup> Tested Samples |  |  |  |  |
| IIIIOIIIIalioii      | 51  | 0   |  |  |  |  |
| Result <sup>#3</sup> | Pass  |   |  |  |  |  |

#### Remark:

#1 : Evaluation results were based on the configuration of the product (See Annex I). Other models had the similar evaluation results with SUN2000-50KTL-M0 for their similar compounds and materials.

#2 : As per Huawei's "Product RoHS Certification Guide", "Annex A in IEC62321" and "Annex D in GB/T26572", the high risk materials include solder (Pb), plating layer (Pb, Cr(VI)), plastic colorant (Pb, Cd and Cr(VI)), ABS (Acrylonitrile Butadiene Styrene) plastic (PBDE), PVC (Polyvinyl Chloride) plastic (Pb, Cd), PP (Polypropylene) plastic (PBDE), PET (Polyester Terephthalate) plastic (PBDE), PBT (Polybutylene Terephthalate) plastic (PBDE), coatings (Pb) and alloy (Pb, Cd and Cr(VI)).

#3 : The results based on the evaluation results and the exemptions in EU RoHS Directives, and all exemptions applied to the evaluated product materials were taken as "Pass" for the evaluation results.

## (2) Information of Failed Sample

From the part fulfil RoHS attribute in PDM System (pdm.huawei.com), MCD (Material Composition Declaration) in Huawei InSight System (insight.huawei.com) and the test report submitted by suppliers and applicant, the contents of restricted substances in EU RoHS are listed in table below.

Table 3 Contents of Restricted Substance in Failed Sample

| Material  Descriptions  Report No. | Papart No. |    | Conte | nt of Rest | ricted Subs | tances (ppi | m) |
|------------------------------------|------------|----|-------|------------|-------------|-------------|----|
|                                    | Cd         | Pb | Hg    | Cr(VI)     | PBB         | PBDE        |    |
| -                                  | -          | -  | -     | -          | -           | -           | -  |

ppm = parts per million

## 4.2 Test Items and Methods of the High Risk Materials

As per the information provided by the applicant, the high risk materials were tested by the following methods.

Table 4 Test Methods of High Risk Materials for RoHS

| Testing Item                          | Test Method  |  |  |  |
|---------------------------------------|--|--|--|--|
| Cadmium (Cd)                          | With reference to IEC 62321, by acid digestion and     |  |  |  |
| Lead (Pb)                             | determined by ICP-OES                                  |  |  |  |
| Mercury (Hg)                          | determined by ICF-OES                                  |  |  |  |
| Havevalent chromium [Cr(\/I)]         | With reference to IEC 62321, by solvent extraction and |  |  |  |
| Hexavalent chromium [Cr(VI)]          | determined by UV-VIS                                   |  |  |  |
| Polybrominated biphenyls (PBB)        | With reference to IEC 62321, by solvent extraction and |  |  |  |
| Polybrominated hiphopyl others (PRDE) | determined by GC/MS                                    |  |  |  |
| Polybrominated biphenyl ethers (PBDE) | determined by GC/MG                                    |  |  |  |

## 4.3 RoHS Requirements

The limits of restricted substances were quoted from 2011/65/EU for homogeneous material.

Table 5 Limits of RoHS Restricted Substances

| Restricted Substances                 | Limits          |
|---------------------------------------|-----------------|
| Cadmium (Cd)                          | 0.01% (100 ppm) |
| Lead (Pb)                             | 0.1% (1000 ppm) |
| Mercury (Hg)                          | 0.1% (1000 ppm) |
| Hexavalent chromium [Cr(VI)]          | 0.1% (1000 ppm) |
| Polybrominated Biphenyls (PBB)        | 0.1% (1000 ppm) |
| Polybrominated Diphenyl Ethers (PBDE) | 0.1% (1000 ppm) |

## 5 REACH SVHC Evaluation

Report No.: SYBH(G)03824184

## 5.1 SVHCs in a concentration above 0.1% (w/w) of article

From the DoC (Document of Conformity), the MCD (Material Composition Declaration) in Huawei InSight System (insight.huawei.com) and the test report submitted by suppliers and applicant, the SVHCs (Substances of Very High Concern) in a concentration above 0.1% (w/w) of "article" are listed in table below.

Table 6 SVHCs in a concentration above 0.1% weight by weight

| SVHCs in a concentration above 0.1% weight by weight | CAS No.   |
|--|-----------|
| ANTIPYONIN   | 1303-96-4 |

| DIBORON TRIOXIDE                    | 1303-86-2  |
|-------------------------------------|------------|
| BORACIC ACID                        | 10043-35-3 |
| 4,4'-METHYLENEDIANILINE             | 101-77-9   |
| N,N-DIMETHYLACETAMIDE               | 127-19-5   |
| 1,3,5-TRIGLYCIDYL-S-TRIAZINETRIONE  | 2451-62-9  |
| LEAD (II) CHROMATE                  | 7758-97-6  |
| BIS (2-ETHYLHEXYL) PHTHALATE (DEHP) | 117-81-7   |

- 1. The results were based on the configuration of the product (See Annex I ) Other models had the similar evaluation results with SUN2000-50KTL-M0 for their similar compounds and materials.
- 2. "Article" in product means an object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition (According to Regulation EC No. 1907/2006). The limit of 0.1% (w/w) applies to every article in the product. The results were calculated to an article defined by decision C-106/14 of EuGH of 10th September 2015.

## 5.2 List of SVHC

According to Regulation EC No. 1907/2006 (REACH) and ECHA (European Chemical Agency) website, the SVHC (Substance of very high concern) was listed on the website (https://echa.europa.eu/candidate-list-table).

## 5.3 Requirements of SVHC

- 5.3.1 In accordance with Regulation (EC) No 1907/2006, any EU manufacturer or importer of articles shall notify ECHA, in accordance with paragraph 2 of Article 7, if a substance meets the criteria in Article 57 and is identified in accordance with Article 59(1) of the Regulation, if (a) the substance in the Candidate List is present in those articles in quantities totaling over one tonne per manufacturer or importer per year; and (b) the substance in the Candidate List is present in those articles above a concentration of 0.1% weight by weight (w/w). The following information has to be submitted for notification:
- a. Identification of the registrant and the substance,
- b. Classification and labeling of the substance,
- c. Description of use of the substance and the article,
- d. Registration number, if available,

- e. Tonnage range.
- 5.3.2 As per article 33 of regulation (EC) No. 1907/2006 (REACH), recipients of product must be provided

with sufficient information, as a minimum, the name of that substance, to allow safe use if the concentration of any SVHC is above 0.1% (w/w). A product meets the requirement of article 33(1) by default when no SVHC exceeds 0.1% (w/w).

#### 5.4 Conclusion

According to specified evaluation processes in this report, substances of very high concern (SVHC) in candidate list promulgated by European Chemicals Agency (ECHA), which are defined in article 57 of regulation (EC) No. 1907/2006 (REACH regulation), are listed in table 6.

## **Evaluation of Packaging Material**

#### 6.1 Requirements of packaging material for restricted substance

- (a) According to EU Packaging Directive (94/62/EC), the sum of contents of restricted substances (Cd, Pb, Hg and Cr (VI)) in packaging material (such as packaging, instruction, guideline and other packaging materials in medium) should be less than 100ppm.
- (b) According to REACH regulation (EC No. 1907/2006), the packaging considered as an independent article should comply with the SVHC requirements, and if the content for individual SVHC more than 0.1% (w/w) should be meet the requirement described in clause 5.3.

## **Evaluation Results of Packaging Material**

From the DoC (Document of Conformity) and the MCD (Material Composition Declaration) in Huawei InSight System (insight.huawei.com) and the test report submitted by suppliers and applicant, the contents of restricted and notification substances for Packaging Directive and SVHC (List described in clause 5.2) in packaging material are listed in table below.

Table 7 Contents of Restricted / Notification Substance in Packaging Material

| Material        | Report | Conten              | t of Res | tricted S | SVHC contents (ppm)  |      |       |
|-----------------|--------|---------------------|----------|-----------|----------------------|------|-------|
| Descriptions    | No.    | Cd Pb Hg Cr(VI) Sum |          | Each SVHC |                      |      |       |
| All materials   | -      | ND                  | ND       | ND        | ND                   | <100 | -     |
| SVHC in Article |        | -                   | -        | -         | -                    | -    | <1000 |
| Conclusion      |        | Pass                |          |           | Don't Need to Notify |      |       |

Remark:

parts per million ppm

ND Not detected (Less than the method limits for the test lab.)

#### 7 **Evaluation of Battery**

Report No.: SYBH(G)03824184

#### 7.1 Requirements of battery for restricted substance

(a) According to EU Battery Directive (2006/66/EC&2013/56/EU), EU shall prohibit the placing on the market of a) all batteries or accumulators, whether or not incorporated into appliances, that contain more than 0.0005 % of mercury by weight; and that contain more than 0.002 % of cadmium by weight. All batteries containing more than 0,004 % lead, shall be marked with the chemical symbol for the metal concerned: Pb.

(b) According to EU REACH Regulation (EC No. 1907/2006), the battery considered as an independent article should comply with the SVHC requirements, and if the content for individual SVHC more than 0.1% (w/w) should be meet the requirement described in clause 5.3.

## 7.2 Evaluation Results of Battery

From the DoC (Document of Conformity) and the MCD (Material Composition Declaration) in Huawei InSight System (insight.huawei.com) and the test report submitted by suppliers and applicant, the contents of restricted and notification substances for battery directive and SVHC (List is described in clause 5.2) in battery are listed in table below.

Table 8 Contents of Restricted / Notification Substance in Battery

| Material         | Report | Content of Restricted Substances (ppm) |    |    | SVHC contents (ppm)  |
|------------------|--------|--|----|----|----------------------|
| Descriptions No. |        | Cd                                     | Pb | Hg | Each SVHC            |
| Battery          | -      | ND                                     | ND | ND | <1000                |
| Conclusion       |        | Pass                                   |    |    | Don't Need to Notify |

Remark:

ppm = parts per million

ND = Not detected (Less than the method limits for the test lab.)

## 8 Evaluation of Other Restricted Substance

## 8.1 Huawei's requirements for restricted substance

Report No.: SYBH(G)03824184

As per Huawei's requirements based on the laws, regulations, decrees and directives for restricted substances in the words, the following substances were forbidden to add in Huawei's product:

Table 9 List of Huawei Restricted Substances

| Compounds Name              | CAS No. | Limits       | Restrictions Scope |
|-----------------------------|---------|--------------|--------------------|
|                             |         | 300 ppm      | Jacket of cable    |
| Lead (Pb)                   |         | 1000 ppm     | All materials,     |
|                             |         | тооо ррпп    | products           |
|                             |         | 100 ppm      | All materials,     |
| Cadmium and its compounds   |         | тоо ррпп     | products           |
| Cadmiditi and its compounds |         | 20           | Battery and        |
|                             |         | 20 ppm       | accumulators       |
|                             |         | 1000 ppm     | All materials,     |

| Formaldehyde   | 50-00-0                  | 75 ppm<br>0.1 ml/m <sup>3</sup> | Textiles and leathers Woods, adhesives   |
| Arsenic / arsenic compounds (As)                           |                          | Intentionally added             | Preservative of wood   |

## 8.2 Evaluation of Materials / Samples

## 8.2.1 Document Evaluation

The evaluation of restricted substances was based on the statistic of material / sample from the history data, and the supplier was evaluated by the material categories, tested data, and so on. All suppliers should provide DoC (Document of Conformity) to prove that their products complied with the requirements of Huawei (See clause 3).

### 8.2.2 Contents of Restricted Substances

As per the data from Huawei InSight System (insight.huawei.com), test report, MCD or DoC provided by supplier, and Huawei's requirements of other restricted substances, the contents of restricted substances in material or sample are described in table below.

Table 10 Test Results of Huawei Restricted Substances

| Material Descriptions | Prohibited Substance | Limit | Content in material / sample |
|-----------------------|----------------------|-------|------------------------------|
| All Materials         | N/A                  | N/A   | N/A                          |

Remark: The evaluation results were based on the configuration of the product.

#### 8.3 Conclusion

As per the results as above (Clause 8.2), the contents of restricted substances in submitted sample **comply with** the requirements of Huawei.

## 9 WEEE Evaluation

## 9.1 WEEE 3R (Recovery, Recycling & Re-use) Evaluation

## 9.1.1 Preparation of Product 3R Evaluation

Report No.: SYBH(G)03824184

According to Articles 8 and the Annex VII of Directive 2012/19/EU (WEEE), the product contains the following substances, preparations and components have to be removed and be selective treated in table below.

Table 11 Removed Components in Product

| Descriptions of Parts and Materials          | Remarks   | Quantity |
|--|---|----------|
| Capacitors / condensers (Containing PCB/PCT) | Polychlorinated biphenyls and polychlorinated terphenyls (PCB/PCT)                                  | 0        |
| Mercury-containing components                | Such as mercury in lamps, display backlights, scanner lamps, switches, batteries                    | 0        |
| Batteries                                    | All types including standard alkaline and lithium coin or button style batteries                    | 1        |
| Printed Circuit Boards (PCB) or              |   |          |
| Printed Circuit Assemblies (PCBA)            | of other devices if the surface of the printed circuit board is greater than 10 square centimeters, | 6        |

| Components and parts containing toner and ink, including liquids, semi-liquids (gel/paste) and toner      | Include the cartridges, print heads, tubes, vent chambers, and service stations.   | 0 |
|---|--|---|
| Plastics containing Brominated Flame Retardants   | Brominated Flame Retardants include PBB, PBDE, HBCDD and so on   | 0 |
| Components and waste containing asbestos  | -  | 0 |
| Cathode Ray Tubes (CRT)   | -  | 0 |
| Chlorofluorocarbons (CFC), hydrochlorofluorocarbons (HCFC) or hydrofluorocarbons (HFC), hydrocarbons (HC) | -  | 0 |
| Gas Discharge Lamps   | -  | 0 |
| Liquid Crystal Displays (LCD)   | With a surface greater than 100 sq cm, includes background illuminated displays with gas discharge lamps   | 0 |
| External electrical cables and cords  | -  | 2 |
| Components, parts and materials containing refractory ceramic fibres                                      | Described in Commission Directive 97/69/EC adapting to technical progress Council Directive 67/548/EEC relating to the classification, packaging and labeling of dangerous substances (2)  | 0 |
| Components, parts and materials containing radioactive substances   | With the exception of components that are below the exemption thresholds set in Article 3 of an Annex I to Council Directive 96/29/Euratom laying down basic safety standards for the protection of the health of workers and the general public against the dangers arising from ionizing radiation (3) | 0 |
| Electrolyte capacitors containing substances of concern   | Height > 25 mm, diameter > 25 mm or proportionately similar volume   | 0 |

## 9.1.2 WEEE 3R Calculation of Product

Report No.: SYBH(G)03824184

As per the evaluation instructions of WEEE 3R and Huawei InSight Platform and according to IEC: TR merge 62635-62650, the results of 3R were listed in table below.

Table 12 Results of WEEE 3R for Evaluated Product

| Material / Part<br>Description | Weight Ratio (%)                       | Recyclability / Reuse Rate | Recoverability<br>Rate | Weight Ratio<br>of Recovery<br>(%) | Weight Ratio of<br>Recycle / Reuse<br>(%) |  |  |  |
|--------------------------------|--|----------------------------|------------------------|------------------------------------|---|--|--|--|
|                                | (1) Parts required selective treatment |                            |                        |                                    |   |  |  |  |
| Power Cable                    | 4.10%                                  | 85%                        | 90%                    | 3.69%                              | 3.49%                                     |  |  |  |

3R = Recovery, Recycling and Re-use

WEEE = Waste Electrical and Electronic Equipment

The evaluation results were based on the configuration of the product (See Annex I)

Other models had the similar evaluation results with SUN2000-50KTL-M0 for their similar compounds and materials.

## 9.1.3 WEEE 3R Conclusion

Report No.: SYBH(G)03824184

According to the evaluation process of WEEE 3R described above clause 9.1.2, the below conclusion

can be gotten in table below.

Table 13 Conclusion of WEEE 3R for Evaluated Product

| Product Name  | SOLAR INVERTER                     |      |  |
|---|------------------------------------|------|--|
| Product Category                                      | IT & Telecommunications Appliances |      |  |
| Reuse/recycling/recovery (3R)                         | Recovery (%) Re-use & Recycling (  |      |  |
| Evaluation Result(SUN2000-50KTL-M0, SUN2000-60KTL-M0) | >80%                               | >70% |  |
| 3R Requirements in WEEE for the Product               | 80%                                | 70%  |  |
| 3R Compliance for the Product                         | PASS                               | PASS |  |

## 9.1.4 Sketch Figure of Sample Disassembly

Report No.: SYBH(G)03824184

The disassembly procedure taken here is in accordance with the treatment requirements under WEEE Directive, and based on economic and efficiency factor, disassembly tools, and current state of the art of recycling and recovery technology. The detailed information for sample disassembly can be described as below in Figure 1.

Figure 1 Sketch Figure of Evaluated Sample Disassembly

Remarks: (All information is from the installation instruction) Two models have the same sketch figure

| No. | Component                | No.  | Component        |
|-----|--------------------------|------|------------------|
| (1) | Maintenance chamber door | (15) | Boost inductor   |
| (2) | Monitoring board         | (16) | Mounting bracket |

| (3)  | PC protective cover                | (17) | Power chamber separator   |
|------|------------------------------------|------|---------------------------|
|      | Tracking system power supply port  |      |                           |

| (10) | Chassis component                  | (24) | Output board              |
| (11) | Heat sink                          | (25) | Logo panel                |
| (12) | Inverter inductor                  | (26) | Power chamber cover       |
| (13) | Invert inductor protective cover   | (27) | Lamp panel                |
| (14) | Boost inductor protective cover    |      |                           |

## 9.1.5 WEEE 3R Requirements

As per WEEE Directive (2012/19/EU), all products sold in EU should comply with the requirements of recovery, recycling and re-use (3R) for their design. Detailed requirements for 3R are described in table below.

Table 14 Requirements of WEEE 3R for Products

| Categories No. | WEEE Category                      | Rate of Recovery | Rate of Recycling & Re-use |
|----------------|------------------------------------|------------------|----------------------------|
| 1              | Large Household Appliances         | 85%              | 80%                        |
| 2              | Small Household Appliances         | 75%              | 55%                        |
| 3              | IT & Telecommunications Appliances | 80%              | 70%                        |
| 4              | Consumer Equipments                | 80%              | 70%                        |
| 5              | Lighting Equipments                | 75%              | 55%                        |
| 5              | Gas Discharge Lamps                | -                | 80%                        |
| 6              | Electrical and Electronic Tools    | 75%              | 55%                        |
| 7              | Toys, Leisure & Sports Equipments  | 75%              | 55%                        |
| 8              | Medical Devices                    | -                | -                          |
| 9              | Monitoring and Control Instruments | 75%              | 55%                        |
| 10             | Automatic Dispensers               | 85%              | 80%                        |

## 9.1.6 WEEE 3R Definition

According to directive 2012/19/EU (WEEE), Re-use, Recycling & Recovery Rate using in the report are calculated as following formulas.

$$RecoveryRate(\%) = \frac{Re - use \& RecyclingWeight + Energy Recovery Weight}{Product Total Weight} \times 100\%$$

$$RecyclingRate(\%) = \frac{RecyclingWeight}{Product Total Weight} \times 100\%$$

$$Re - use Rate(\%) = \frac{Re - use Weight}{Product Total Weight} \times 100\%$$

Remark: Total weigh of the product includes the main product and accessories weight.

## 9.2 WEEE Design Evaluation

## 9.2.1 WEEE Design Requirements

According to 2012/19/EU, the producer is encouraged to design and produce EEE product with taking into full account and facilitate dismantling and recovery, in particular the re-use and recycling of WEEE, their components and materials. The below is the detailed requirements for the product design for WEEE.

- (1) Producers should not prevent, through specific design features or manufacturing processes, WEEE from being reused, unless such specific design features or manufacturing processes present overriding advantages, for example, with regard to the protection of the environment and/or safety requirements.
- (2) Where appropriate, priority should be given to the reuse of WEEE and its components, subassemblies and consumables.
- (3) Where re-use is not preferable, all WEEE collected separately should be sent for recovery, in the course of which a high level of recycling and recovery should be achieved.
- (4) Producers should be encouraged to integrate recycled material in new equipment.

## 9.2.2 Conclusion of WEEE Design Evaluation

Report No.: SYBH(G)03824184

In the process of product design and manufacturing, the procedure was based on the company document "Energy Saving Design Guidelines, V7.0, Green Design for Structure" from the Ministry of Energy Saving to meet the WEEE requirements. As per the product instruction evaluated, the following conclusion can be gotten in table below.

Table 15 Results of Product Design

| ı   | Product Design Requirements                                     | Actual Status for Evaluated Product   | Results |
|-----|---|---|---------|
| (a) | Specific design features for reuse and repair                   | The evaluated product was designed for modularization and easy disassembly.       | Yes     |
| (b) | Reuse of WEEE and its components, subassemblies and consumables | The reused parts were used in the evaluated product.                              | Yes     |
| (c) | Recoverable materials were used                                 | The Green materials and recoverable materials were used in the evaluated product. | Yes     |
| (d) | Integrated recycled materials                                   | The integrated recycled materials were used in                                    | Yes     |

|            | were encouraged to use | the evaluated product. |  |
|------------|------------------------|------------------------|--|
| Conclusion |                        | Complies               |  |

## 9.3 WEEE Label Evaluation

## 9.3.1 WEEE Label Requirements

As per the requirements of WEEE directive (2012/19/EU), producer is committed to marking all obligated EEE put on EU market with the crossed-out wheeled bin symbol, and the WEEE symbol should meet the requirements of EU standard EN50419: 2005. According to Standard EN50419: 2005, the WEEE symbol should meet the below requirements.

- (1) The symbol should be printed on the product. In special circumstances, the label can be marked on the package and instruction if it cannot be marked on the product surface for its size.
- (2) The symbol must be printed visibly, legibly and indelibly.
- (3) The dimensional relationship should meet that (Figure 2):
  - (a) The symbol should consist of a solid bar, the height of which equals "h" and the width of which equals 1.2a (a is the height of the body of crossed-out wheeled bin).
  - (b) The height (h) of the bar shall be the greater of 0.3a or 1mm.
  - (c) The bar should only be used in conjunction with the crossed-out wheeled bin.
  - (d) The bar should not contain any text or any kind of additional information.

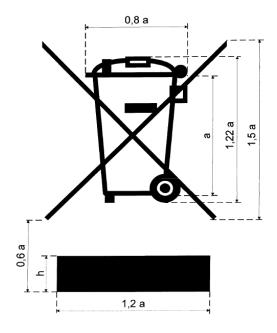

Figure 2 WEEE Symbol Requirements

## 9.3.2 Conclusion of WEEE Label Evaluation

Report No.: SYBH(G)03824184

As per the WEEE label on the product, the label was affixed on the product and the label passed the label test before its sales. From the WEEE label on product, the below evaluation results can be gotten in table below.

| No. | Label Requirements | Actual Status for Evaluated Product  | Results |
|-----|--------------------|--|---------|
| (a) | Symbol Position    | Product, package and instruction   | Yes     |
| (b) | Size               | The "a" was more than 3.333mm and the "h" was more than 1mm on label of product. | Yes     |
| (c) | Visibly            | The label passed the label test for visible legible                              | Yes     |
| (d) | Legibly            | The label passed the label test for visibly, legibly                             | Yes     |
| (e) | Indelibly          | and indelibly.   | Yes     |

**Pass** 

Table 16 Results of WEEE Label Evaluation

## 9.4 Product Recycling Evaluation

Conclusion

## 9.4.1 Requirements of Product Recycling

According to WEEE directive (2012/19/EU), producers should finance collection from collection facilities, and the treatment, recovery and disposal of WEEE. The producer should be able to choose to fulfill this obligation either individually or by joining a collective scheme. As per the requirements of WEEE directive (2012/19/EU), the producer should:

- (1) Join in or set up a collective system or individual system for WEEE.
- (2) Register as producer in every EU member.
- (3) Pay for the wastes of electrical and electronic equipment.
- (4) Report the quantities and categories of EEE put on every EU country periodically.
- (5) Collect the WEEE from customer when individual system.
- (6) Take charge of the transportation of WEEE when individual system.
- (7) Take charge of the dismantling and sorting of WEEE when individual system.
- (8) Handle with the special materials (such as containing hazardous substances) in products.
- (9) Manage the documents of WEEE evidence for at least 10 years.
- (10) Provide necessary WEEE evidences when necessary.

## 9.4.2 Conclusion of Product Recycling

Report No.: SYBH(G)03824184

As per the recycling process for Huawei products in EU, the below evaluation results can be gotten in table below.

Table 17 Results of WEEE Recycling Evaluation

| No. | Product Recycling Requirements        |  | Results  |
|-----|---------------------------------------|--|----------|
|     |                                       | Huawei joined in collective system for |          |
| 1   | Join in or set up a collective system | B to C products#2 and appointed many   | Complies |
| 1   | or individual system                  | recycling suppliers as individual      | Complies |
|     |                                       | system suppliers for B to B products#3 |          |
| 2   | Register as producer in every EU      | Huawei had registered as producer in   | Complies |
|     | member                                | every EU member.                       | Complies |

| 3          | Pay for the WEEE  | Huawei pays to the collective system or individual system in EU member for  | Complies |
|------------|---|---|----------|
| 4          | Report the quantities and categories                                      | WEEE.  Huawei report to the local government for the product's quantities and categories termly.  | Complies |
| 5          | Collect the WEEE from customer when individual system                     | Huawei is responsible for the B2B WEEE collection, and transport them to  | Complies |
| 6          | Take charge of the transportation of WEEE when individual system          | <b>Huawei's warehouse</b> . B2C WEEE is collected by collective system.   | Complies |
| 7          | Take charge of the dismantling and sorting of WEEE when individual system | For B2C WEEE, they are dismantled and sorted by collective system. For B2B WEEE, they are dismantled and sorted by appointed recycling supplier in individual system. | Complies |
| 8          | Handle with the special materials in products                             | For special material, they are separated to recycle by <b>local recycling supplier</b> .  | Complies |
| 9          | Manage the documents of WEEE evidence for at least 10years                | All documents for product WEEE were   | Complies |
| 10         | Provide necessary WEEE evidences when necessary                           | stored and copied for <b>at least 10years</b> in Huawei.  | Complies |
| Conclusion |   | Complies  |          |

## Remarks

#1 : For detailed information and evidence documents, please contact with Huawei "Return

Management Department".

#2 : B to C product means Business to Customer products#3 : B to B product means Business to Business products

## 10 Compliance Results in Other Countries

## 10.1 Restricted Substances Information in Product

According to China RoHS (Management measures for the restriction of hazardous substances in electrical and electronic products) and India RoHS, the contents of restricted substances should be shown in the product documentation. As per the evaluation process and the data in Huawei InSight System (insight.huawei.com), the below table was made for the product and its fittings.

Table 18 Restricted Substances Table in Product

| Dort Deceriations | Restricted Substances in Product |    |    |        |     |      |  |
|-------------------|----------------------------------|----|----|--------|-----|------|--|
| Part Descriptions | Cd                               | Pb | Hg | Cr(VI) | PBB | PBDE |  |
| Cabinet           | 0                                | ×  | 0  | 0      | 0   | 0    |  |
| PCBA              | 0                                | ×  | 0  | 0      | 0   | 0    |  |
| Cable             | 0                                | ×  | 0  | 0      | 0   | 0    |  |

Report No.: SYBH(G)03824184 Huawei Proprietary and Confidential Copyright © Huawei Technologies Co., Ltd

| Corollary   | 0 | × | 0 | 0 | 0 | 0 |
|-------------|---|---|---|---|---|---|
| Equipment   |   |   |   |   |   |   |
| Accessories | 0 | × | 0 | 0 | 0 | 0 |
| Battery     | 0 | 0 | 0 | 0 | 0 | 0 |

O : It means that the content of the restricted substance in all materials of part is less than

the limit defined in GB/T 26572, SJ/T 11363 and other similar directives in other countries.

× : It means that the content of the restricted substance in at least one homogenous material

of part is not less than the limit defined in GB/T 26572, SJ/T 11363 and other similar  $\frac{1}{2}$ 

directives in other countries.

The contents of restricted substances are more than the limits defined in standard, but they are exempted from the standard and can be used in product.

## 10.2 Restricted Substances Compliance Results in Other Countries

As per the above evaluation results and the laws / regulations / directives for prohibited substances in the world, the compliance results for restricted substances in different countries as below in table below can be gotten.

Table 19 Evaluation of Huawei's Product in different countries

| Region    | Requirements of material / sample / product   | Conclusion |
|-----------|---|------------|
| EU and    | EU RoHS (2011/65/EU), REACH ((EC) No. 1907/2006) SVHC, REACH  |            |
| EEA       | Appendix XVII, Battery Directive (2006/66/EC&2013/56/EU), Packaging   | Pass       |
| Countries | Directive (94/62/EC), Montreal Protocol, Stockholm Convention   |            |
| Turkey    | Turkey RoHS (Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment) No. 26891, Montreal Protocol, Stockholm Convention                      | Pass       |
| Ukraine   | Ukraine RoHS (Technical Regulation for Restricting the Use of Certain Hazardous Substances in Electrical and Electronic Equipment) No. 139, Montreal Protocol, Stockholm Convention | Pass       |
| Germany   | EU RoHS, GS PAHs Requirement, REACH SVHC, REACH Appendix XVII, Battery Directive, Packaging Directive, Montreal Protocol, Stockholm Convention                                      | Pass       |
| America   | TPCH, CA 65 (California Proposition), CA RoHS (SB20/50), Montreal Protocol, Stockholm Convention  | Pass       |
| Canada    | SOR 2014-254, SOR 2012-286, Montreal Protocol, Stockholm<br>Convention  | Pass       |
