

REACH – Declaration of Conformity

Declaration of Conformity pursuant to Regulation (EC) No 1907/2006 (REACH)

About This Document

This document constitutes Sollex's declaration of conformity with Regulation (EC) No 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH). The declaration covers the products that Sollex manufactures, imports and distributes, and describes how we ensure compliance with applicable chemicals legislation within the EU and the EEA.

The following sections describe our commitment, the scope of application, and the controls and procedures underpinning this declaration. A brief summary of the key details is provided in the table at the end for ease of reference.

Commitment to Compliance

Sollex undertakes to conduct its operations in accordance with the requirements of the REACH Regulation and to continuously monitor updates to the Regulation, including changes to the candidate list and the restriction annexes. We work systematically to ensure that the products we supply are safe to use and that relevant information about chemical content is communicated throughout the supply chain.

Registration and Role in the Supply Chain

Sollex fulfils the obligations arising from the company's role under REACH, whether we act as manufacturer, importer or downstream user. Where a registration obligation applies, we ensure that the substances concerned are registered with the European Chemicals Agency (ECHA), or that registration is handled by our upstream supplier.

Substances of Very High Concern (SVHC)

Sollex continuously monitors the candidate list of Substances of Very High Concern (SVHC). If a product contains an SVHC substance in a concentration exceeding 0.1% by weight (w/w), we inform our customers in accordance with Article 33 of REACH, so that the product can be handled safely in subsequent stages of the supply chain.

Restricted and Authorisation-Subject Substances

Sollex ensures that the products we supply do not contain substances in breach of the restrictions set out in Annex XVII, and that no substances subject to authorisation under Annex XIV are used without the required authorisation. We continuously monitor additions and amendments to these annexes and adjust our material choices and procurement accordingly.

Scope of Application

This declaration applies to the products and articles included in the Sollex range at the time of issue. The declaration concerns the products' conformity with REACH with respect to registration, information and restriction requirements. Product-specific documentation, such as safety data sheets where required, is provided on request.

Control and Follow-Up

REACH compliance is integrated into Sollex's quality and environmental management systems. We conduct regular supplier reviews, collect and verify information on chemical content, and document the results as a basis for corrective actions and continuous improvement.

- Ongoing monitoring of the candidate list and of Annexes XIV and XVII.
- Collection and verification of declarations and certificates from suppliers.
- Forwarding of SVHC information to customers under Article 33 when the 0.1% threshold is exceeded.
- Documentation and traceability as part of our quality and environmental management systems.

Validity

- This declaration is valid from the date of issue and until further notice. In the event of material changes to legislation, product composition or the supply chain, the document is updated and supersedes any previous version.

Summary

Table 1. Key information regarding this REACH declaration

Item	Details
Company	Sollex AB
Regulation	(EC) No 1907/2006 (REACH)

Item	Details
Scope	Registration, information (Art. 33), restrictions (Annex XVII), authorisation (Annex XIV)
SVHC threshold	0.1% by weight (w/w)
Supervisory authority	European Chemicals Agency (ECHA)
Date of issue	2026-09-25
Validity	Until further notice, superseded upon change

Signature

This declaration is issued by an authorised representative of Sollex and reflects the company's known circumstances at the time of issue.
