

Safety Data Sheet (SDS)

Statement regarding the applicability of a Safety Data Sheet under REACH

Statement

Sollex products are articles as defined by REACH, and under normal and reasonably foreseeable conditions of use they do not release any substance, which means the criteria for issuing a Safety Data Sheet are not met. A Safety Data Sheet under REACH Annex II is required only for substances and mixtures classified as hazardous, and it therefore does not apply to Sollex's articles — for these, the relevant chemical information is instead communicated through our Article 33 / SCIP declaration.

Conclusion

- No Safety Data Sheet is required for Sollex's products. Relevant substance information is provided through our Article 33 / SCIP declaration on request.

Summary

Table 1. Key information regarding SDS applicability
