**GLASS FIBER**

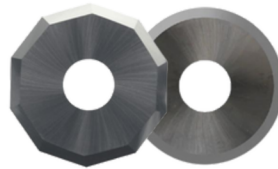

## KNIVES TO CUT DRY & PREPREG FIBER COMPOSITES

Sollex offers high-quality industrial knives for digital and ultrasonic cutting of composites materials like carbon fiber, glass fiber, aramid fiber (Dupont® Kevlar®), technical textiles, fabric etc.

### ABOUT SOLLEX

We are a Swedish company with a proud heritage dating back to 1927. Specializing in high-quality machine knives and industrial blades, we provide cutting-edge solutions to process plastic film, foil, rubber, foam, composites, and many other materials. Our expertise ensures precision, durability, and efficiency for industries that demand the best in cutting performance.

### Rotary & decagonal tungsten carbide knives for digital cutting of dry fiber textile composites

art. no Z50, Z52, Z53, P945  
Ø25mm, Ø32mm

Compatible with Zünd, Summa, Esko Kongsberg, Gerber, Colex, iEcho flatbed cutting tables

### Tungsten carbide knives for fiber prepreg composites

Z10 / cut. depth 4.8mm

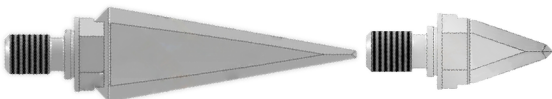

Z11 / cut. depth 6.9mm

Z62 / cut. depth 13mm

Compatible with Zünd, Esko Kongsberg, Gerber, Colex cutting systems

### Ultrasonic knives & custom-made solutions

Ultra-fine grain solid tungsten carbide knives for high-frequency cutting

### Handheld knives & blades

Snap off blades 18mm  
art. no. 180P

Blades 18mm without segments  
art. no. 180LUS

Address: Sollex AB, Box 5161, 20071, Malmö, Sweden
