

The background of the advertisement features a close-up, high-angle shot of a metal deburring machine. A long, thin metal blade is positioned diagonally across the frame, held in place by a black spring mechanism. The machine's body is dark grey or black. In the lower right corner, a pair of red-handled pliers is visible, with its jaws open. The overall lighting is bright and even, highlighting the metallic surfaces and the red handles.

MOZART®

FINEST IN BLADES

MOZART KNIVES AND BLADES FOR PLASTICS DEBURRING AND PRECISION CUTTING

- ✓ For manufacturers and processors of injection moulded plastic and foamed parts, of composite materials, of processors of textile samples, etc., for example for the automotive industry

MOZART PRECISION-CUT KNIVES AND HANDLES FOR YOUR APPLICATION!

Precision-cut knife with knurled screw

for fast blade changes without tools
7F (2514.02) slim knife for very fine cuts
8F (2515.04) powerful, ergonomically designed knife
9F (2515.05) as for 8F, but with additional thread for attaching a mandrel

Precision-cut knife with oval-head Allen screw

prevents scratch damage to workpieces
1F (2514.00) slim knife for finest cuts
3F (2515.00) powerful, ergonomically designed knife
5F (2515.02) as for 3F, but with additional thread for attaching a mandrel
For knives 1F-5F, we recommend the protective cap with the integrated Allen key for quick & easy blade changes

Standard blade F1 #512.050
also suitable for scraping

Safety blade F4 #512.052
with rounded tip

Special blade F22 #512.063
for accurate plunge-cutting thanks to the exposed tip

Pointed blade F3 #512.053
with a particularly fine tip for precise cutting

Safety blade F17 #512.059
for very shallow cuts

Hook blade F18 #512.060
for optimum plunge-cutting and radius cutting

Special blade F21 #512.062
with rounded tip and reduced length, for controlled cutting

Standard blade F20 #90512.058
