# Your supplier of knives and slitter blades

Sollex is a Swedish family company founded in 1927. We have products with cutting edge technology that improves your process and solve problems. With the right blade, you can get simplified maintenance, time savings and an improved final product.

We make our blades in top quality materials in Sweden and Germany. Our blades last longer and gives you a competitive maintenance advantage. What's more, we keep most products in stock which guarantees you fast shipments.

Sollex ships knives and blades to Europe on a daily basis but also to industries in the US, Middle East and Asia. Whatever your needs, we have accumulated hundreds of different products in different materials and designs. This so you will find the right blade for your cutting process.

Welcome to Sollex!

## SLOTTED SLITTER BLADES

- for plastic film and foil

Slotted slitter blades in solid tungsten carbide or ceramic are characterized by extreme performance and durability. If you want to cut thin stretched film, our Z-coating fits while white plastic film (as an additive chalk) slitter blades with K-coatings is a good choice. For really tough films Sollex X coating is recommended.

### STRAIGHT CORNERS

57\*19\*0.20mm / 0.40mm

FROM  
**€ 70** / 100PCS

SKU	Product	Application	Thick., mm	Pack, pcs
5-020	Carbon steel	Simple plastic with few additives	0.20	200
5Q	Ceramic	White plastics with additives	0.40	100
5L	Stainless steel	Simple plastic with few additives	0.40	100
5V	Solid tungsten carbide	Hard laminated films (PE) and plastic packaging	0.40	10
5C	Solid ceramic	Soft flexible film folies (EBA)	0.40	10

### ROUNDED CORNERS

57\*19\*0.20mm / 0.40mm

FROM  
**€ 166** / 100PCS

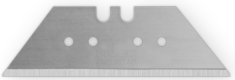

SKU	Product	Application	Thick., mm	Pack, pcs
5-020-Z	Zero friction	Thin stretched film	0.20	200
5K	Ceramic	White plastics with additives	0.40	100
5Z	Zero friction	Thin stretched film	0.40	100
5T	Titanium	Plastic film with additives	0.40	100
5X	Solid ceramic	Plastic film with additives, multilayer	0.40	30

## PRODUCT QUALITIES & COATINGS

	Specification	Material to cut
 <p>975P Utility blade PRO</p>	<b>P</b> <b>PRO</b> Blade with good performance for professionals.	Cardboard, plastics and in industrial production
 <p>975PT Utility blade PRO Titan</p>	<b>PT</b> <b>PRO TITAN</b> Titanium coated blades for handheld tools, with very good performance.	Paper, cardboard, plastic film
 <p>975B Utility blade Banzai</p>	<b>B</b> <b>Banzai</b> Blades with extreme performance.	Reinforced flex materials and lead plates
 <p>5T Slitter blade Titan</p>	<b>T</b> <b>Titanium</b> Titanium (TiN) coated blades for optimal slitting performance. Gold colored edge. Low friction which gives less dust. Competitive durability and performance. FDA-approved	Plastic film and foil with few additives
 <p>5K Slitter blade Ceramic</p>	<b>K</b> <b>Ceramic</b> Black coating on the edge with a very fine grain structure which protects the edge optimally when cutting white plastics with a high percentage of chalk. FDA-approved	White plastics with additives
 <p>5Z Slitter blade Zero-Friction</p>	<b>Z</b> <b>Zero-friction</b> Grey coating on the edge. Extremely fine grain structure which gives minimal friction, which is optimal for high speed cutting. The coating is FDA and EC approved for coming in contact with food. Very good durability and performance.	Thin stretched film
 <p>5X Slitter blade Full Ceramic</p>	<b>X</b> <b>Full Ceramic</b> Full ceramic coated blade where the sides of the blade are also coated. The coating is FDA and EC approved for coming into contact with food. Gives an extreme durability when cutting in materials with very grueling additives.	Plastic film with additives multilayer
 <p>5C Slitter blade Solid Ceramic</p>	<b>C</b> <b>Solid Ceramic</b> Self grinding during use and heat resistant. Uncompromising quality for users with the highest requirements on blade performance. The blades are very fragile which sometimes makes handling difficult. Blade can be used for cutting soft elastic film that melts easily. The C-blade maintains sharpness and temperature.	Soft flexible film folies (EBA)
 <p>5V Slitter blade Solid Tungsten Carbide</p>	<b>V</b> <b>Solid tungsten carbide</b> Industrial blade with extreme resistance and durability. Solid tungsten carbide gives robustness and performance. Extreme performance and durability.	Hard laminated films (PE) and plastic packaging

You can save money by using double sided blades where all four corners of the blade are used. Sollex reduces your costs and inventory. You can save money by using double sided blades where all four corners of the blade are used.
