
istor STANDARD SWISS SHARPENER - 10 cm

Small sized Sharpener for knives and scissors

Weight net 24 g
Weight gross 46 g
Length 10 cm

Small pocket-sized Sharpener, for small blades in the kitchen and in the household.

Finds place in every trouser pocket, so very ideal for using outdoor (hunting, fishing, camping, trekking) as well. Also very liked as gift/promotional gift.

Sharpens in only few seconds small knives, serrated knives, scissors, hoof and claw knives.

The handle is made of aluminium, this makes the sharpener light and allows good printings. The insert is a hard metal mixture, nearly as hard as diamond, practically no wear.

Instructions: Pull the concave sharpening edge of the insert gently along the blade edge, respecting its existing angle. No pressure is required. **Work only with one side** of the sharpener and always from the handle to the point of the blade. When sharpening **Scissors, Secateurs and Pruning Shears** only sharpen the bevelled side.

Five-year warranty for manufacturing defects
