

# TXR Performance

## Rear axel kit Volvo 7-940

# Use mounting kit A

**Weld the plate on the rear axel  
with 4 x 1cm long weld**

# Use mounting kit B

# Use mounting kit C

**Drill 5 pieces of 12 mm hole through the floor**

**Reinforce the back of the beam as much as you think it is needed. Use supplied reinforceplate on the inside of the car**

**Install the upper strut in the top slot with the specialbolt**

**The upper strut has two different bushings. 14 mm on the rear axle and 12 mm towards the front upper strut**
