Eggcrate	Φ 885 mm (34.8" )	

Light Dome II – Makes one incredibly even and big soft light.

## Main Features

- Best for portraits, interviews, professional filmmaking and facial shots;
- Full silver coating intensifies output strength for more control over light source;
- Deep dome design(24" deep) ensures tighter, more focused beam;
- Unique dual diffuser design ensures even distribution of the light across the entire field;
- Large 34.8" outer diffuser increases size of beam which makes a softer and more flattering light;
- Smooth round-shaped hexadecagon light output for beautiful catchlight;
- Bundled with 2 different thickness of outer diffuser fabric to allow user control different softness (by 1.5 stop and 2.5 stop brightness);
- Re-designed 16 rods of wear-resistant hadfield steel construction for one-person fast setup;
- Bundled with honeycomb grid add-on help control light spill spread by 40 degrees;
- Bundled with a gel holder for filmmaker to design light colours.
