Flexi Wave

Design ⊕ Absorption ⊕ Diffusion

Available Wood Colors

Available Fabric Colors

Flexi Wave 60

Flexi Wave 120

Flexi Wave is made from Polyurethane Foam, Fabric and Wood. The wooden frame is available in black, white, or with a natural wood finish. The panel is a combination of wood and replaceable acoustic foam that is covered with premium fabric available in 8 different colors. The panels are very easy to install, hooking on to existing ceiling or wall frames or glued directly to flat surfaced ceilings and walls. Flexi Wave's excellent performance and its beautiful design make this product suitable for any types of spaces.

Performance

This hybrid acoustic panel acts as an absorber and diffuser simultaneously.
