Innovative Acoustic Solutions

# Super Bass Extreme

Designed to dampen low frequency sound energy

Optimized for corner mounting, Super Bass Extreme's elegant wooden front is based on Vicoustic's flagship WaveWood panel. This is combined with a membrane, two high-density foam layers and a micro-perforated rear panel, with 1mm holes, that acts as a Helmholtz resonator. The wooden front panel has two functions, providing sufficient mid-high frequency absorption to control corner reflections without deadening the sound, while simultaneously acting as a diffuser. Super Bass Extreme is available in five wood finishes and SuperBass Extreme Premium has a variety of eight fabric colors.
