Innovative Acoustic Solutions

ViCloud

Acoustic islands designed for public spaces

Made with EuroClass B VicPET Wool, ViCloud offers a simple and lightweight solution to reduce noise levels inside any space. Clouds have been used for years, but they're usually expensive and installed only by professionals. ViCloud differs from the rest, offering a lower priced solution that is easy to install by anyone. A great product range, different colours and shapes, with several possible applications at a very competitive price are the main advantages of this new product line.

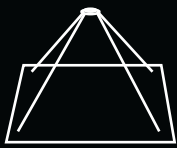

Fire rated:
Euroclass B

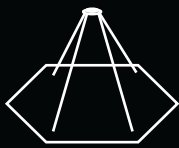

99% made of
recycled materials
