Changing the Installation Experience.

30 October 2019

New Precision Line –
sharp and clean edge even
for the most challenging
installations.

Portfolio Overview

Knifeless Tape

- Precisely and efficiently cut through graphic film without a knife and without surface damage to create a clean line.
- 3M Knifeless Tapes are the flexible, blade-free, damage-free way to quickly and confidently cut graphic film with precision.
- Don't cut – pull! Easily trim graphic film using a patented filament-tape design that turns in any direction to follow contours.

Changing the
installation
experience

An updated 3M™ Knifeless Portfolio

From

- 6 Products

To

- 7 Products
- All-in-one product for thicker films
- Same color tape for thicker films
- Cover Tape for PPF applications available separately

- The new design clearly highlights the product name as installers should use this packaging to store their tape between uses to prevent dust and dirt
- All products will be packaged in re-sealable, single roll pouches

Knifeless Tapes Precision Line

3M™ Precision Line Knifeless Tape KTS-PL1

This revolutionary tool gives even the most challenging film installations a sharp, clean edge.

- Ultra-fine, ultra-sharp filament cuts reflective, metallic, chrome, dry-erase, 3M™ DI-NOC™ films, overlaminates, paint protection film*, plus many other vinyl and non-vinyl films
- Patented design turns easily in any direction to follow contours and curves
- For single or multiple layer applications

** Test and approve when using Precision Line Knifeless Tape while cutting paint protection film. Refer to the product bulletin for more information including the use of a cover tape for a cleaner cut.*

3M Finish Line Knifeless Tape

50m and 10m trial size roll

Our #1 product set the new industry standard for finishing vehicle graphic installations without a blade.

- Original Knifeless Tape
- Best tape for new Knifeless installers as it is less likely to break during installations
- Tape must be cut with a blade
- Can handle multiple layers and laminated vinyl

3M Bridge Line Knifeless Tape

Create evenly cut graphics bridging from one pane to the next for a professional finish.

- Used to achieve clean and uniform cuts in wide gaps between doors, fenders and rubber moldings
- Tape must be cut with a blade
- For single or multiple vinyl layer applications

3M Perf Line Knifeless Tape

Easily cut a uniform margin between window graphic and rubber molding.

- Use to cut laminated perforated window films and create a uniform relief cut along rubber molding before applying edge-sealing tape
- Tape must be cut with a blade
- Can be used to bridge tight gaps and trimming

3M Design Line Knifeless Tape

Flexible tape and filament is engineered to easily create highly contoured designs and leave a sharp, clean edge.

- Can break with hand – quicker installs but potential for breakage
- Designed with 3M 1080/1380 in mind
- For single layer vinyl applications

3M Tri Line Knifeless Tape

6mm spacing and 9mm spacing

Unique, triple-lined tape ensures accurate, consistent stripe width from one end of the car to the other.

- Create pinstripes, gaps and butt seams that rival using a knife or plotter
- Create different widths using 6mm, 9mm or a combination of both
- Patented design stretches slightly and turns easily in any direction for one-of-a-kind works of art
- Tape can be broken with hands for faster application

3M

Precision Line Knifeless Tape

This revolutionary tool gives even the most challenging film installations a sharp, clean edge.

- **Ultra-fine, ultra-sharp filament cuts reflective, metallic, chrome, dry-erase, 3M™ DI-NOC™ films, overlaminates, paint protection film*, plus many other vinyl and non-vinyl films**
- **Patented design turns easily in any direction to follow contours and curves**
- **For single or multiple layer applications**

For PPF applications please use cover tape....“ 3M™ Scotch® Fine Line Tape 218, please check product bulletin
