REKOLA REFLEX

Ecological and smart cleaning solution

Discover the Rekola Reflex system.

Floor

Telescopic handle + Squeegee

Our telescopic handle and squeegee form an ergonomic and efficient tool for mopcloths and also works excellently as a squeegee.

Rekola Reflex H MOPCLOTH (23-2055)

For daily cleaning of all floor surfaces with high hygiene requirements.

100% ultra microfibre; 40% recycled PES.

Damp:
0,4-0,7 dl / mopcloth
Wet:
0,8-1 dl / mopcloth

Rekola Reflex G MOPCLOTH (23-4059)

For daily cleaning of all floor surfaces.

50% ultra microfibre, 50% PET; 44% recycled PES.

Damp:
0,4-0,7 dl / mopcloth
Wet:
0,8-1 dl / mopcloth

Rekola Reflex S MOPCLOTH (23-7059)

For hard and ceramic floors. Despite its abrasive properties, it does not scratch.

50% ultra microfibre, 50% PET film; 40% recycled PES.

Damp:
1 dl / mopcloth

Rekola Reflex A MOPCLOTH (23-0057)

For removing dirt and dust particles from large areas. High absorbency (450 ml per mopcloth)

100% microfibre.

Damp:
1 dl / mopcloth
Wet:
2 dl / mopcloth

ADDITIONALLY: Studies have shown that REKOLA REFLEX mop cloths remove up to 99.9%* of bacteria from surfaces.

*: Tests conducted by Weber & Leucht GmbH

Surfaces

Rekola Reflex S PAD (21-035X)

Abrasive pad for hand cleaning, specifically designed for use in kitchens and bathrooms.

Outer layer: 55% ultra microfibre and 45% PET film.
Inner layer: 100% ultra microfibre; 40% recycled material.

Product codes: 21-0350 (blue)
21-0354 (red)
21-0355 (green)
21-0356 (yellow)

Wet:
0,65 dl / pad

Measuring 17x22 cm, the S-pad is a highly effective microfibre cloth with an abrasive effect. It is suitable for cleaning all surfaces where increased mechanical power is needed without scratching, such as sinks and tiles.

Rekola Reflex C CLOTH (24-925X)

Versatile ultra microfibre cloths for hand cleaning of all hard surfaces.

100% ultra microfibre.

Product codes: 24-9250 (blue)
24-9254 (red)
24-9255 (green)
24-9256 (yellow)

Damp:
0,2 dl / cloth

Wet:
0,4 dl / cloth

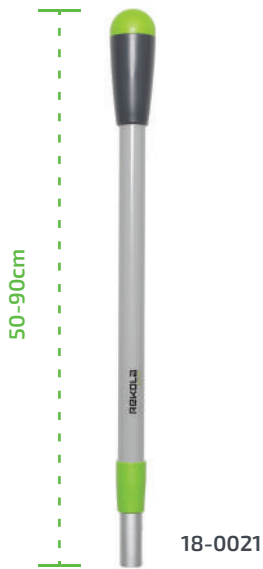

The C-cloth is a versatile 32x32 cm cloth made of ultra-fine microfibre, suitable for all hard flat surfaces such as glass, chrome, and mirrors. Its unique pocket structure effectively removes large dirt and dust particles.

TIP: We recommend dampening the pads and cloths in a washing machine or bucket/sink during preparation. See the pre-moistening section.

Surfaces

DuoFlex

Specially engineered tool and frame deliver increased surface pressure for more effective cleaning of surfaces. Double-sided design maximizes amount of area cleaned.

Rekola Reflex M DuoPad (24-90080)

Mesh pad specially designed for glass surfaces such as windows and mirrors.

Damp:
50-75 ml / pad
Wet:
100-150 ml / pad

Rekola Reflex G DuoPad (24-90076)

Ultra microfibre pad for versatile use on surfaces like tables and walls.

Damp:
50-75 ml / pad
Wet:
100 ml / pad

Rekola Reflex S DuoPad (24-90077)

A versatile abrasive pad suitable for removing stubborn stains from hard surfaces.

Works on most surfaces at 50 ml / pad
Recommended: wet
100-150 ml / pad

Pre-moistening

In the washing machine

Wash the mopcloths in the washing machine and place them damp directly into the box for use.

Pre-moisten in the box

Place the mopcloths, S-pads, or C-cloths in the box and dispense the correct amount of water or cleaning solution according to the number of cloths.

Rekola Reflex H MOPCLOTH

Damp: 4 - 7 dl / 10 mopcloths
= 0,4 - 0,7 dl / mopcloth

Wet: 8 - 10 dl / 10 mopcloths
= 0,8 - 1 dl / mopcloth

Rekola Reflex S PAD

Wet: 6,5 dl / 10 pads
= 0,65 dl / pad

Rekola Reflex G MOPCLOTH

Damp: 4 - 7 dl / 10 mopcloths
= 0,4 - 0,7 dl / mopcloth

Wet: 8 - 10 dl / 10 mopcloths
= 0,8 - 1 dl / mopcloth

Rekola Reflex C CLOTH

Damp: 2 dl / 10 cloths
= 0,2 dl / cloth

Wet: 4 dl / 10 cloths
= 0,4 dl / cloth

Washing instructions

This is how you keep your Rekola Reflex products clean

- The washing machine should be used only for cleaning textiles.
- Sort the laundry; mopcloths and cleaning cloths should be washed separately.
- The detergent should be suitable for microfibre materials.
- Always follow Rekola's instructions regarding the washing program, washing temperature, and drying.
- Maintain washing equipment regularly to ensure clean textiles.

1. Load the washing machine with the correct amount of material

Maximum load capacity for mopcloths

Maximum load capacity for microfibre cloths

DO NOT MIX MOPCLOTHS WITH OTHER CLOTHS!

2. Pre-wash

Minimum number of rinse cycles

Cold water

NO DETERGENT!

3. Washing program

Recommended water amount

Max. temperature

• For special hygiene requirements, a disinfection washing program can be used. Consult your Rekola contact for advice.

DO NOT USE BLEACH!

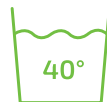

DO NOT OVERDOSE DETERGENT!

• Causes permanent damage to textiles.

4. Rinse

Minimum number of rinse cycles

Rinse temperature

1. rinse - 40°
2. rinse - 20°
3. rinse - cold

DO NOT USE SOFTENER OR RINSE AID!

5. Drying

40° Max. temperature

DRY AT A LOW TEMPERATURE

Maximum load capacity

Laundry must be able to move freely in the dryer; otherwise, it will overheat.

Our materials withstand up to 95 °C (except for the S-pad and S-mopcloth = max. 60 °C), but we recommend thermal disinfection washing at higher temperatures. This reduces energy consumption and improves material durability. A sufficient hygiene level is achieved at 72–78 °C for 10 minutes.
